SALES PLAN

ZOOM

Community tokens, as digital assets, are already starting to play a crucial role in the Stabila ecosystem with widespread adoption among crypto networks. As the technology undergoes continuous evolution, community tokens will be accepted by larger communities, such as blockchains or exchanges built around decentralized products. Moreover, they have massive potential to redefine the way companies can generate targeted business opportunities. By building a decentralized and secure ecosystem that caters to only their genuine customers, it will ultimately result in long-term growth prospects that directly influence the value of their respective token.

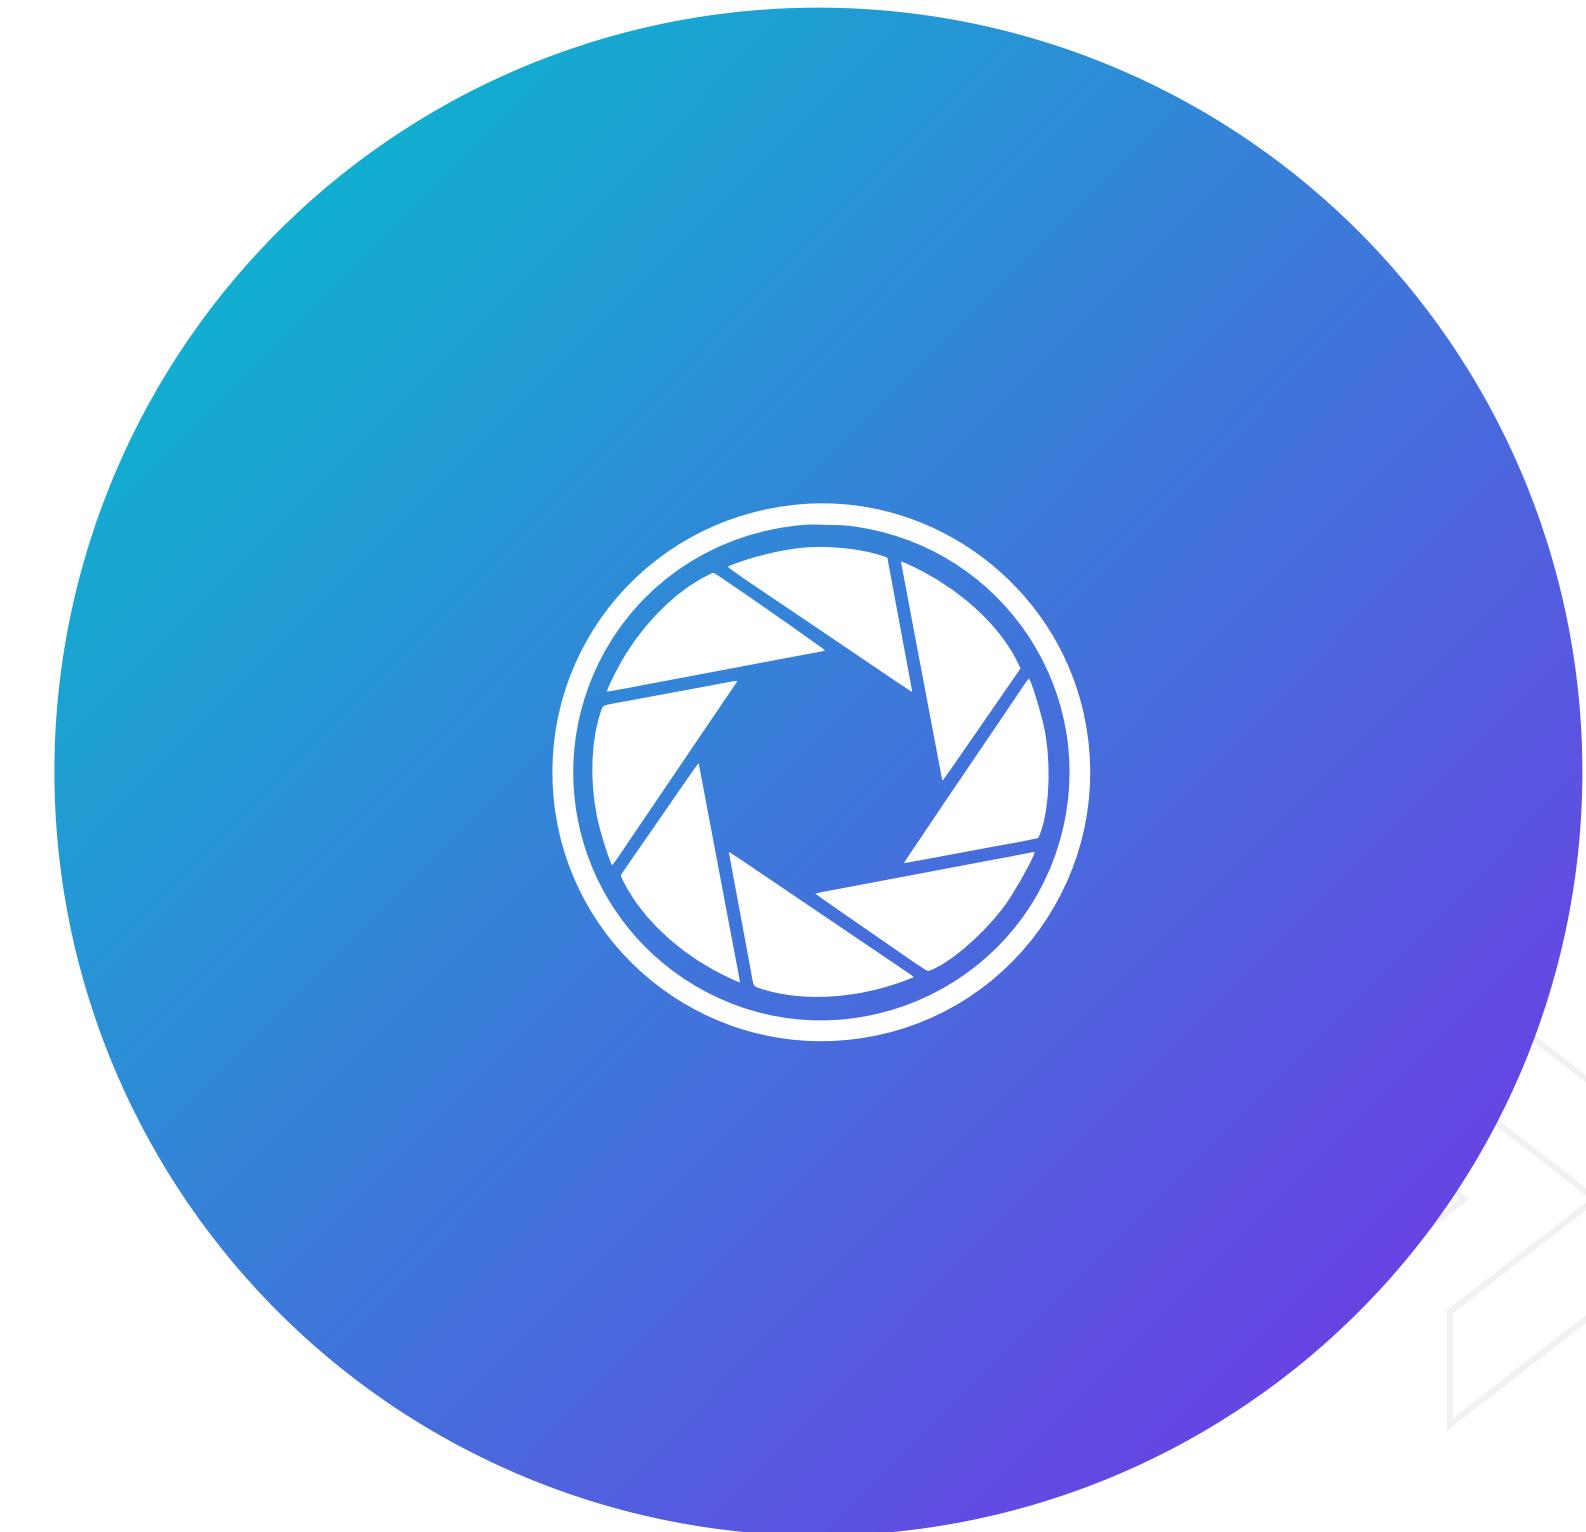

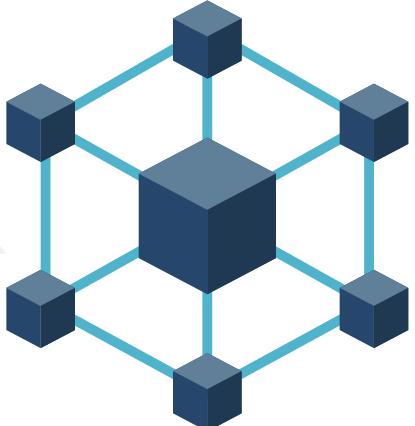

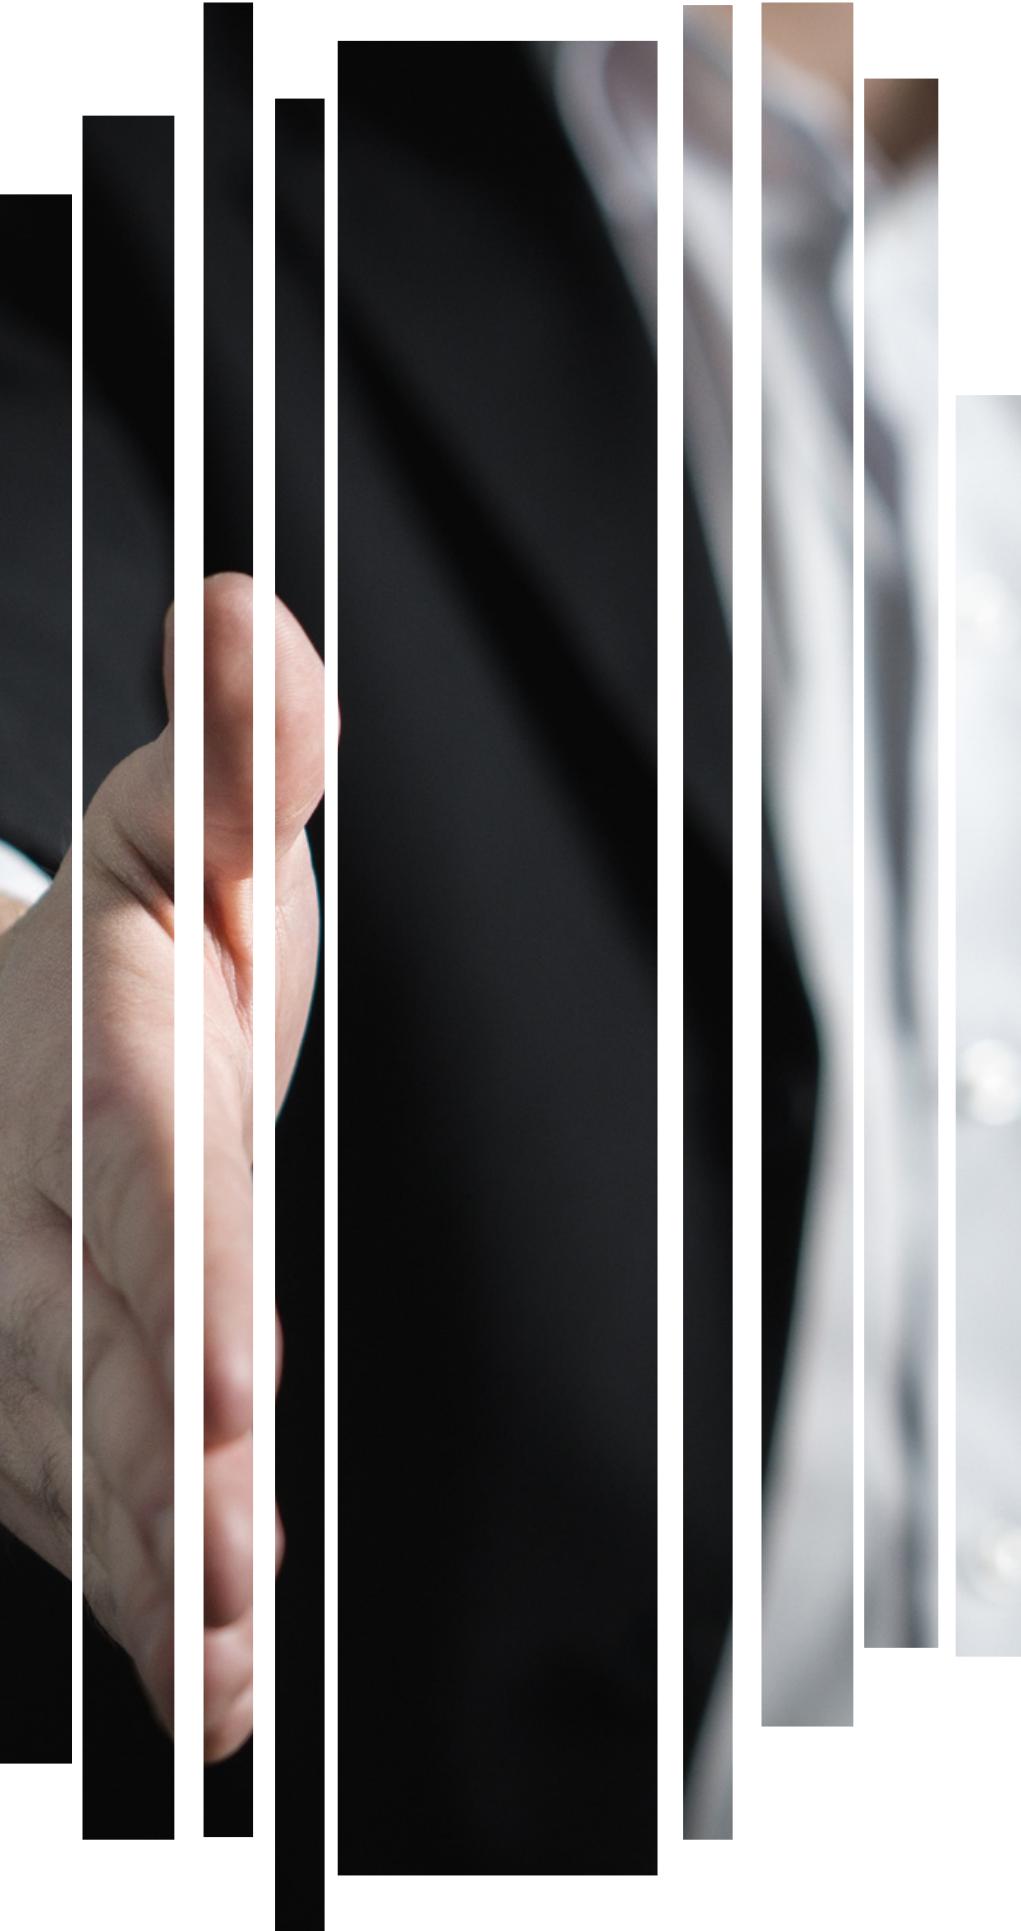

ABOUT ZOOM TOKEN

ZOOM token is the first community token created on Stabila Blockchain. The token can be traded. Exchange rates will apply at the date of exchange listing.

Chain: Stabila

MONETA TOKEN SALES AND ICO

A comprehensive solution to the adoption of cryptocurrency by the masses is needed. Moneta holders and new crypto clients will be able to purchase cryptocurrencies and carry out transactions in just a few clicks.

Private Sales
